Subject: Certification of Completion

Dear Mr. Dorman:

This letter certifies completion of the 2002 – 2004 water system project (DW # 1000363-01-005 and DW # 1000363-03-002A) for Western Pulaski County Water District (WPCWD; PWSID# 1000363). This project was amended once (due to the addition of \$550,000 in KIA grant money) and included an earlier permit for an emergency pump replacement (DW # 1000363-00-003, bid, contracted, and certified complete in 2000).

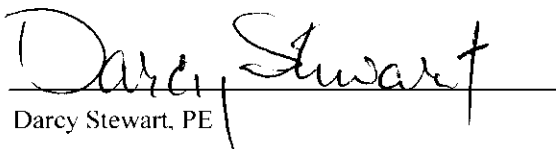

This notice to your office, on behalf of WPCWD, complies with an order[↑] for the District to report progress on this project.

The construction work is complete per the permit, regulations, plans, and specifications for all seven (7) contracts. The water line additions have been inspected, tested, and accepted into the water system by WPCWD for operation and maintenance. The total cost was \$2,932,977.45, including construction, land acquisition, legal, administrative, engineering, inspection, and interest. 177 new customers are served by the project additions (actually about 40 more have been added since the close of project contracts). A number of system improvements, including a new 500,000-gallon ground storage tank, larger 10" and 8" mains, parallel mains, new telemetry controls, etc, have been made to improve overall system capacity and performance.

The as-built plans have been delivered to the District along with the maintenance manual and construction photo album.

If there are any questions, please call. Thank you.

Sincerely,

Darcy Stewart, PE
